RELEASE: IMMEDIATE

FOR ITS NEXT 50 YEARS, MASSANUTTEN COMMITS TO ENERGY EFFICIENT OPERATIONS Resort to install Virginia ski industry's first solar arrays

MASSANUTTEN (March 8, 2022) – Having just celebrated its 50th anniversary and previously announcing significant improvements to energy efficiency in new snowmaking installations, Massanutten Resorts is now adding solar power arrays to its sustainability efforts. The arrays are believed to be the first serving a major ski and summer resort in Virginia.

The first two installations will be rooftop arrays on the resort's Woodstone Creek building and its housekeeping department's laundry facility. Between them, the two arrays are expected to produce more than 354,000 kilowatt hours (kwh) of power annually. The average single family home uses 14,000 kwh of electricity annually.

Pending approval by Rockingham County, a third installation will begin service soon: a ground array adjacent to the WaterPark. That array is expected to produce more than 19 million kwh per year.

"Sustainability and minimizing our carbon footprint will be among key focuses in coming years," said Steve Krohn, Chief Operating Officer of The Resorts Companies, which owns Massanutten. "We're making significant improvements to our lift trail and snowmaking infrastructure, and doing so in the most energy efficient way possible. Making investments in solar power generation supports those goals."

Design and engineering work is being managed by Secure Futures LLC of Staunton, Virginia.

"Helping Massanutten include solar energy generation in its sustainability vision is an honor," said Ryan. 3 (e)-3 (.)(3..TeL)9 (t)-dstmin t (o)4.2 (f S)1.5 (e)7.8 (c)-1.9 (u)3.2 (re)-3 (F)1.5 (u)2.3 (t)-3 (u)2.3 (re)
